OVERVIEW

Who this guide is for

This guide walks every user of a Tickblaze partner prop firm through connecting the Tickblaze desktop platform to their prop firm account. There are two starting points depending on whether you've used Tickblaze before — both converge on the same shared connection steps.

PATH A

New Tickblaze Users

Complete the full setup — activation, password creation, download, then the shared connection flow.

[Jump to Path A →](#)

PATH B

Existing Tickblaze Users

Log in with your existing credentials and skip straight to the shared connection steps.

PATH A · FOR NEW USERS

Activate & download Tickblaze

Tickblaze is the preferred trading platform and is **included with your prop firm account**. Before downloading, activate your Member's Area account.

STEP 1 Activate your Member's Area account

1. Go to the **Tickblaze Member's Area** at members.tickblaze.com and sign in with the **email** and **temporary password** from your onboarding email.
2. Complete the registration form: update your **name** and set a **new password**.

Please Update Your Profile Here.

Update Your Profile

New Password

Confirm New Password

Member's Area — Update Your Profile

STEP 2 Confirm and log in

You'll see a confirmation notice. Log in with your new password to access the Member's Area.

CONFIRMATION

Your information is updated. Please login to proceed

Confirmation → Login

STEP 3 Download the Tickblaze platform

Once your profile is activated, download Tickblaze directly from the Member's Area:

members.tickblaze.com/downloads

Which version to choose?

We recommend the **Current Version** for best stability. The **New Version** gives early access to new features but may contain bugs.

Member's Area — Download page

PATH B · FOR EXISTING USERS

Log in to Tickblaze

1. Launch the **Tickblaze** platform.
2. Log in using your existing credentials.

Forgot your password?

Reset it via the Tickblaze Member's Area at members.tickblaze.com.

Platform login

Create your Data Connection

STEP 4 Open the Connections menu

In the Tickblaze platform, open **Menu (≡) → Connections**, then click **New Data Connection**.

Menu → Connections → New Data Connection

STEP 5 Configure the data provider

In the **Data Connection Wizard**, step through three pages in order:

1. Select **TickblazeData** as the Data Provider.
2. Enter a **Connection Name** (e.g. `TB-[prop firm]`).
3. Under **Provider Settings**, set **PropFirm** to `[prop firm]` .

1 · Select TickblazeData

2 · Name it TB-[prop firm]

3 · PropFirm = [prop firm]

BEFORE YOU SIGN

Professional vs Non-Professional status

Read this page first. On the next step you'll sign the Market Data Agreement, which asks you to classify yourself as either a Non-Professional or a Professional user. This determines which market data fees apply — so it's important to choose correctly *before* you sign.

Most users qualify

Non-Professional

L1 (top-of-book) data fee is **included** with your purchase.

You qualify if all of the following are true:

- You are trading for personal use
- You do not hold a financial license (e.g. Series 7, Series 56)
- You are not employed by a financial institution, hedge fund, or brokerage
- You are not using market data for business or institutional purposes

L2 add-on available

You can still purchase **L2 (Depth of Book)** as a Non-Professional via the Data Add-on page at checkout.

Extra fee applies

Professional

Both **L1 (top-of-book)** and **L2 (Depth of Book)** are required for Pro users. Pro data access requires an extra fee — confirm the exact amount with your prop firm.

You qualify as a Professional if any of the following is true:

- You hold a valid financial license
- You are employed by a financial or trading firm
- You use market data on behalf of a company, business, or institution

Fee terms

The Professional fee is charged **per calendar month**, is **non-prorated**, and is **non-refundable** once selected.

Choosing correctly matters

If any statement in the Non-Professional criteria is untrue for you, you **must** classify yourself as Professional. Misclassification can result in retroactive fees and compliance issues.

STEP 6

Sign the Market Data Agreements

After selecting your new data connection, you'll be prompted to complete **two mandatory agreements** before market data begins streaming. Using the classification you chose on the previous page, complete both steps below in order.

6.1 Market Data Self-Certification

Open the Self-Certification document, choose the classification you determined on the previous page — **Non-Professional** or **Professional** — and click **Select** to submit.

The screenshot shows a 'Certification Window' with a dark background. On the left, there is a list of options: 'Self Certification Pro Status' and 'Self Certification Non-Pro Status'. The 'Self Certification Non-Pro Status' option is highlighted with a blue bar. To the right of this list, the text for 'Self Certification Non-Pro Status' is displayed. It starts with 'NON-PROFESSIONAL SUBSCRIBER' and explains that by clicking 'Non-Professional', the user certifies they meet certain criteria. It lists requirements for a Non-Professional Subscriber, including being an individual or small business entity, having an active trading account, and using market data solely for personal or private use. At the bottom right of the window, there is a 'Select' button highlighted with a red box.

Certification Window — choose Pro or Non-Pro, then Select

6.2 Subscriber Addendum

Open the Subscriber Addendum, review the terms, and click **Accept** to complete the second agreement.

The screenshot shows the 'Certification Window' with a 'Details' sub-window open. The 'Details' window has a title bar and a close button. Inside, the title 'SUBSCRIBER ADDENDUM' is highlighted with a red box. The text below explains that the addendum is between the 'Distributor' and the 'Subscriber'. It then lists the background information, stating that the Distributor has entered into an agreement with Chicago Mercantile Exchange Inc (or its successors or assignees) ('CME') whereby CME Group has granted the Distributor (which may include certain other Affiliates of Distributor authorized by CME (collectively the 'Distributor')) the right to use CME's market data. At the bottom of the 'Details' window, there are 'Cancel' and 'Accept' buttons. The 'Accept' button is highlighted with a red box. The main 'Certification Window' also has a 'Select' button at the bottom right, which is also highlighted with a red box.

Subscriber Addendum — review and Accept

STEP 7

Create your Broker Connection

Repeat the **same process for a New Broker Connection** under **Menu → Connections → New Broker Connection**. Select **TickblazeOMS** as the Broker provider, name the connection, and enter your Tickblaze credentials with PropFirm set to **[prop firm]**.

1 · Select TickblazeOMS

2 · PropFirm = [prop firm] → Finish

STEP 8

You're all set

Data Connected · Broker Connected — your account is live.

After the wizard finishes, return to **Connections** and select both the Data Connection and Broker Connection you created. When both indicators are green near the top of the Tickblaze window, you're fully connected.

Both indicators green — connections are active

View accounts

See all your trading accounts in the **Account** field on any chart.

Monitor trades

Track positions and P&L via the **Accounts** tab.

Execute orders

Place and manage orders directly inside Tickblaze.
